Summary

I am a highly dedicated and passionate technologist working on a bachelor's degree in computer science. A lifelong fascination with technology has fueled my commitment to staying at the forefront of innovation. I am also highly passionate about people and adept at connecting with individuals from diverse backgrounds and life experiences, fostering meaningful relationships and promoting interactions. Because of this, I thrive in roles that enable me to connect with new individuals and create exceptional experiences for them.

Experience

Summer Application Development Co-Op

F.N.B. Corporation

May 2023 - Present (5 months)

Full-time, immersive 15-week co-op experience consisting of Angular development, Bootstrap, Azure DevOps, Ivanti, Java, and more.

- Developed crucial components for a sophisticated internal loan review application using Angular framework.
- Collaborated effectively on API integration and SQL database interactions, enhancing the project's seamless functionality.
- Utilized Angular expertise to design and implement significant features- such as a re-designed KPI dashboard and PDF generation- elevating user experience and system efficiency.
- Leveraged Azure and Git to proficiently manage version control, creating branches, merging changes, and facilitating smooth collaboration among development team members.

Technology Associate

Staples

Jun 2022 - Present (1 year 4 months)

Customer service job consisting of cash handling, technical support, and multitasking within a fast-paced goal and team-oriented space.

- Engaged customers at the cash register with a friendly and efficient approach, handling transactions accurately and maintaining a positive store experience.
- Demonstrated technical expertise by addressing customers' technology-related queries, providing effective troubleshooting, and resolving issues promptly.
- Contributed to maintaining high customer satisfaction levels by delivering exceptional service and support across various aspects of the store's operations.

- Distinguished as a district leader in driving reward account sign-ups, displaying exceptional leadership and communication skills to motivate the team in achieving and exceeding account enrollment targets.

Voter Contact Campaign Staff

The Outreach Team

Sep 2022 - Nov 2022 (3 months)

Seasonal voter canvassing position for a large organization, reaching out to thousands of individuals across the state.

- Conducted statewide door-to-door canvassing, inspiring civic engagement and voter participation through personal interactions.
- Utilized strong interpersonal skills to foster meaningful conversations and establish rapport with a diverse range of individuals.
- Significantly contributed to elevated voter participation by effectively delivering compelling messages and addressing inquiries.
- Played a pivotal role in promoting democratic values and empowering citizens to exercise their right to vote.

Student Intern

FedEx

Aug 2018 - Jun 2019 (11 months)

In-depth internship working alongside senior software developers in FedEx's corporate office.

- Supported a Software Developer team in creating, deploying, and maintaining company web applications.
- Utilized JavaScript extensively, supplemented by SQL and Java, to ensure application functionality.
- Collaborated on developing, deploying, and maintaining web applications, contributing to team success.
- Engaged in daily scrum meetings, fostering effective communication and coordination within the development team.

Student Intern

Red House Communications, Inc.

Aug 2017 - Jun 2018 (11 months)

Year-long student internship working at one of the largest advertising agencies in the world.

- Gained comprehensive understanding of advertising by immersing in the complete design process, yielding valuable insights.
- Created engaging web interfaces, harmonizing design concepts with user-friendly functionality.

- Supported full advertising campaign lifecycle, from initial client interactions to final delivery, fostering hands-on experience.
- Actively engaged in weekly client meetings, fostering clear communication and alignment throughout advertising projects.

Education

Point Park University

Bachelor of Applied Science - BASc, Computer Science

2022 - 2024

- Gained many skills in a wide range of technologies, including JavaScript, Java, C#, and SQL, with hands-on experience translating theoretical knowledge into practical applications.
- Well-rounded education combining technical expertise with a solid foundation in business, demonstrated through coursework in human resources and ethics.
